

Avinash Marbhal

Software Engineer | Angular Developer

+91 87964 57407 | avinashmarbhal1994@outlook.com

Profile

Experienced Front-End Developer with 4 years of expertise, including 1 year in UI Development and 3 years in Angular Development. Skilled in creating dynamic, user-friendly web applications with a focus on performance and scalability. Proficient in leveraging Angular to build robust, efficient, and maintainable code. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

Experience

WEB DEVELOPER | MINDLINE TECHNOLOGIES PVT. LTD. | JAN 2021 – JAN 2022

- Designed and developed responsive user interfaces.
- Conducted user testing to gather feedback and make improvements.
- Utilized HTML, CSS, JavaScript, and other programming languages.
- Collaborated with cross-functional teams to meet project deadlines.

ANGULAR DEVELOPER | BLEUEBENZ DIGITIZATIONS PVT. LTD. | FEB 2022 – MAR 2024

- Developed web applications using Angular framework
- Collaborated with cross-functional teams to design and implement features.
- Conducted code reviews and implemented quality control measures.
- Streamlined development process to increase efficiency.

WEB DEVELOPER | MANORAMA INFOSOLUTIONS PVT. LTD. | OCT 2024 – PRESENT

- Developed web applications using Angular framework
- Collaborated with cross-functional teams to design and implement features.
- Conducted code reviews and implemented quality control measures.
- Streamlined development process to increase efficiency

Technology Stack

- | | |
|---------------------------|---------------------------------|
| • HTML5 | • CSS3, SCSS, SASS |
| • Bootstrap, Tailwind CSS | • JavaScript, TypeScript |
| • jQuery | • Angular 13+ |
| • RxJS, NgRX | • React.js & Next.js with redux |
| • AdobeXD, Figma, Sketch | • RESTful API |
| • Git, Gitlab, Github | • Agile Methodology |

Projects

Website for interior designer for Creative Interior

Website for Annapurneshwari English Medium School

Website for an agricultural weapons and machinery

Agricultural website

Website for traditional pottery for Pitaara Terracotta

E-Commerce website for Manmandir House, Kolhapur

SageSure – Secure Document Management Portal

- Engineered a robust portal to manage document exchange between SageSure and Laser Print Plus (LPP), offering real-time document tracking.
- Implemented role-based access control (RBAC) to improve system security and reduce unauthorized interactions.
- Developed comprehensive admin dashboards for managing uploads, deletions, and user actions, increasing operational transparency and reducing turnaround time.
- **Tech Stack:** HTML, CSS, Bootstrap 5, Angular 14, TypeScript

HRM Portal for Aptara Corporation

- Automate and manage hiring, document collection, role assignment, and exit procedures.
- Real-time tracking of employee attendance, leave applications, approvals, and balance monitoring.
- Generate salary slips, manage tax deductions, and process payroll with minimal manual effort.
- Allow employees to update profiles, view payslips, apply for leaves, and track attendance.
- Gain actionable insights with visual reports and metrics on workforce trends and HR operations.
- **Tech Stack:** HTML, CSS, Bootstrap 5, Angular 14, TypeScript

Contract Management Tool

- **Contract Creation & Templates:** Allows users to generate standardized contracts using pre-approved templates.
- **Approval Workflow:** Built-in multi-level approval system with role-based access ensures compliance and transparency.
- **Document Management:** Secure storage and version control of all contract-related documents in a searchable repository.
- **Notifications & Reminders:** Automated alerts for key milestones such as expiry dates, renewals, and review timelines.
- **Audit Trail:** Complete history of contract modifications and actions taken for accountability and governance.
- **Reports & Dashboards:** Real-time insights into contract statuses, pending approvals, and upcoming expirations.
- **Tech Stack:** HTML, CSS, Bootstrap 5.2, Angular 15, TypeScript

Sutra Plus - Inventory App

- **Real-Time Inventory Tracking:** View live stock status across multiple locations to ensure accurate availability.
- **Item Categorization & Master Management:** Centralized control over item classifications, suppliers, and product details.
- **Procurement Workflow:** Streamlined purchase requisition, approval, and goods receipt process.
- **Stock In/Out Management:** Easy logging of stock entries, transfers, and issue returns with audit trails.
- **Reports & Analytics:** Generate insightful reports on inventory movements, valuation, shortages, and reorder levels.
- **User Access Control:** Role-based access to ensure secure and authorized operations.
- **Tech Stack:** HTML5, CSS3, Bootstrap 5.2, Angular 15, TypeScript

Investment Portal

- **Investment Proposal Management:** Submission, evaluation, and approval workflows for new investment opportunities.
- **Portfolio Tracking:** Real-time monitoring of active investments, including ROI, maturity dates, and performance metrics.
- **Approval Workflows:** Role-based access and multi-level approval systems to ensure governance and accountability.
- **Dashboards & Reports:** Visual insights into investment trends, fund allocations, and overall portfolio performance.
- **Alerts & Notifications:** Automated reminders for maturity, renewals, and key investment milestones.
- **Tech Stack:** HTML5, CSS3, Bootstrap 5.2, Angular 15, TypeScript

Ticketing Tool

- **Ticket Creation & Categorization:** Users can log tickets with priority levels, issue types, and attachments for clarity.
- **Automated Assignment:** Smart routing of tickets to appropriate IT personnel or support teams based on issue type and priority.
- **Real-Time Status Tracking:** Transparency into ticket progress, from initiation to resolution, with live updates.
- **SLA Management:** Built-in Service Level Agreements to ensure timely resolution and accountability.
- **Notifications & Reminders:** Email and in-app alerts for updates, escalations, and closures.
- **Reports & Dashboards:** Analytics on ticket volume, response time, resolution efficiency, and team performance.
- **Tech Stack:** HTML5, CSS3, Bootstrap 5.2, Angular 15, TypeScript

Pepper Advantage – Loan & Security Management Platform

- **Loan Tracking:** Real-time visibility into active and closed loans with EMI schedules, outstanding balances, and repayment history.
- **Borrower Management:** Centralized borrower profiles with associated documentation and financial background.
- **Delinquency Monitoring:** Automated alerts and dashboards to flag overdue payments and high-risk accounts.
- **Collateral Management:** Tracks details of physical and financial securities pledged against loans (e.g., property, fixed deposits).
- **Document Vault:** Secure storage and retrieval of property papers, valuation reports, legal documents, etc.
- **Verification & Compliance:** Workflow to handle legal and technical verification of assets and ensure regulatory compliance.
- **Tech Stack:** HTML5, CSS3, Bootstrap 5.3, Angular 16, TypeScript

Virtual Bench – Resource Pool Management System

- **Employee Profiling:** Maintain detailed profiles of bench employees including skills, past projects, certifications, and availability.
- **Project Matching:** Intelligent matching of available resources with upcoming or open project requirements.
- **Allocation Workflow:** Streamlined process for initiating, approving, and tracking internal resource deployments.
- **Status Dashboard:** Live insights into resource bench count, deployment history, and utilization trends.

- **Notifications & Alerts:** Automated updates for new allocations, availability changes, and skill match opportunities.
- **Reports & Analytics:** Insights for HR and project managers on resource movement, idle time, and workforce planning.
- **Tech Stack:** HTML5, CSS3, Bootstrap 5.3, Angular 16, TypeScript

Mahalaxmi Website

- **Client** - Western Maharashtra Devasthan Committee, Govt. of Maharashtra
- Designed and developed responsive layouts using modern HTML, CSS, and Angular techniques.
- Implemented smooth UI animations for better user experience.
- Integrated BillDesk payment gateway for secure and reliable payment processing.
- Ensured cross-browser compatibility and optimized performance across devices.
- **Tech Stack:** HTML5, CSS3, Bootstrap 5.3, Angular 19, jQuery
- **Link** - <https://mahalaxmikolhapur.com/home>

Lifeline Suite (Government & Corporate) – Current Project

- A robust hospital solution with modules designed to streamline clinical, administrative, and operational workflows across hospital
- Contributed to modules such as Patient Admission, Clinical Services, EMR, Diagnostics, Pharmacy, Inventory.
- Involved in implementing new features and addressing reported system bugs.
- **Tech Stack:** HTML5, CSS3, Bootstrap 5.3, JavaScript, jQuery

Education

SECONDARY SCHOOL CERTIFICATE | MARCH 2010

HIGHER SECONDARY CERTIFICATE | MARCH 2012
